our sound, our community, our chance

Science Peer Review Workshop

The Puget Sound Partnership, in cooperation with NOAA Northwest Fisheries Science Center, is synthesizing information from existing assessments within the Puget Sound ecosystem to develop a status report on the condition of the Sound. The report will also include a synthesis of the greatest threats to Puget Sound's health. Objectives of the peer review workshop include:

- Identify other existing datasets to add to the synthesis
- Refine methodology used to synthesize status and threat indicators
- Help identify existing conceptual models that link status and threats with priority actions

Wednesday, February 20, 2008

1 – 5 p.m.

Location

Lake Union Park Naval Reserve Building, Great Hall
860 Terry Ave N • Seattle, WA 98109
