Subject: Priorities anticipated??

I don't see any reference to priorities for the various action items. What comes first??

I see no point in going after residential shoreline property owners considering any negative impact they might have on the quality of the Puget Sound environment. Relatively speaking, the West Point sewage plant and other large sewage plants need to be "fixed" before anything else is done to restore the Sound. Also, I fail to see why City's are exempt from rainwater runoff regulation.

Government should be first to clean up its act as government is the largest polluter.

Awaiting your response.
