

PUGET SOUND PARTNERSHIP

Update on Inventory of Current Activities for the Action Agenda

The Partnership has asked agencies and organizations region-wide to help build an inventory of current activities (e.g. restoration, education, pollution prevention) aimed at protecting and/or restoring Puget Sound. Once completed, the inventory will be a comprehensive catalog of existing programs throughout Puget Sound. This catalog will provide us the tool we need to prepare summarized reports by action area, city or county, agency or organization, and topic.

We will use the inventory to evaluate our current efforts at the regional and local level to help understand what programs are moving us toward a healthy Sound, what programs may not be working and what programs are missing.

In order to collect these data as quickly and efficiently as possible, an online form or an excel spreadsheet have been available online. The inventory is due from participating organizations by February 29, although the deadline for cities is March 7.

Here is a status report as of February 27, 2008 at 11:00 a.m.

- Approximately 145 entities and over 1,000 programs that have provided some level of information for the inventory project. See attached list.
- Some of the entities have given information on many programs, for example Pierce County has 64, while others have provided information for a single program.
- Program information ranges from large-scale Puget Sound wide programs such as the Alliance for Puget Sound Shoreline acquisition program to programs at the local jurisdiction scale such as street sweeping.

We will bring a sample of an entry to the meeting.
