

# Snohomish River

## Salmon Recovery Planning Area

- | Land Ownership |                            | Land Cover - Land Use |                               |
|----------------|----------------------------|-----------------------|-------------------------------|
|                | Federal Conservation Lands |                       | Commercial & Residential Uses |
|                | Other Federal Lands        |                       | Agricultural Uses             |
|                | State Conservation Lands   |                       | Disturbed Lands               |
|                | State Trust Forest Lands   |                       | Freshwater Wetlands           |
|                | County & Municipal Lands   |                       | Undeveloped Uplands           |
|                | Private Conservation Lands |                       |                               |

Land ownership data has been overlaid on land cover / land use data to provide a useful context to communicate relative protection. Land cover / land use classification was derived from the USGS National Land Cover Database (1992). Land ownership in Snohomish County was derived from the Washington Protected Lands Database (2003). Land ownership in King County was derived from WA DNR data layers and may not include all county, municipal and private conservation lands.
